EMAIL WRITING

Subject: Question regarding the upcoming Java Exam

Dear Professor Smith,

My name is Chandana Sree, and I am a first-semester student in your class.

I am currently preparing for our upcoming Java exam and working through some practical coding problems. While reviewing the material, I ran into a bit of confusion regarding ternary operators and wanted to make sure I fully grasp the practical application before the test.

Could you please let me know if it is best to clarify this over email, or if I should stop by during your scheduled office hours?

Thank you very much for your time and guidance.

Best regards,

Gollareddygari Chandhana Sree
